

ELECTION PERILS

John Michael Chambers

Election day draws near, with only a few weeks remaining before November 5, 2024. But will we actually be voting on election day? Should we be voting on election day? Is it civil unrest or a civil war that the deep state apparatus has its sights set on? America, freedom, and liberty itself hang in the balance. Let's explore these very important questions.

What Could Possibly Go Wrong?

John Michael Chambers speaking at seminar.

Let's get this on record first. Voter fraud and election theft have been going on for many years. Progress in these past four years has been made in terms of raising awareness of the 2020 election theft. Various cases have been presented at the local and state levels and even at the Supreme Court level. With the Brunson case still being looked at, we find ourselves at a very dangerous moment on election day. Why? Consider this.

The Left knows it cannot win in a legitimate, free, and fair election and will stop at nothing to avoid a Trump victory. Hmm, let's see. A disastrous debate for Biden was followed by an assassination attempt. A disastrous debate with Harris followed by a second assassination attempt at Trump International Golf Course. Chaos looms with currency and economic issues of great concern. Threats of cyber attack and nuclear war. Another "Plandemic"?

The computers are still rigged; the fix is already in. Nothing has been corrected in the digital aspect, as far as I am aware. The last go around, Covid was conveniently released, and the lock-downs flooded the paper ballot harvesting scheme, as documented in the Dinesh D'Souza film "2000 Mules." Then there is the influx of an estimated 15 million or more illegal entries at the southern border since the Biden-Harris administration seized control over the executive branch. These individuals could become voters in the 2024 election if the left and deep state have their way.

Vote as If Your Life Depended on It

So should we even vote on November 5th with all the previous, new, and current threats to our election system? Absolutely! It is our duty to vote.

Assuming there is an election on November 5th, the odds, in my opinion, are that we witness what we saw in 2020. The consequence will be far worse. We should expect delays in tallying the final results across many states, with days perhaps weeks to further tamper with the results.

VOTE

Expect Election Interference and Interruptions

What could cause the election to be interrupted or deferred? Complete chaos and destruction across numerous cities in America, as discussed in detail with Juan O'Savin on 6 June 2024. Juan talked about a future "near death experience" for America that will be beyond human comprehension. Check out video of our conversation, "Attacks on the Homeland Disruptions and Destruction," on StormsUponUs.com and on my Rumble channel.

Dr. Jan Halper-Hayes

Direct Threats at the Polls

Dr. Jan Halper-Hayes, who presently serves in the DOD on a task force committee, said that one possible solution would be to have the national guard or military supervise the election in the battleground states. The most recent interview with Jan is also on StormsUponUs.com. Among law abiding people, there is no refuting the need to return to paper ballots and require voter ID while enforcing the illegality of non-citizens voting. That's a good start since most states block legislative efforts to protect the integrity of voting and are NOT prepared for these measures in 2024.

Please Remain Seated

Only God knows how this will play out, but common sense to the awakened patriot knows there is severe turbulence ahead.

Emergency Preparedness

I am hopeful that the EBS (Emergency Broadcast System) is functioning, the truths of the treason and crimes will be revealed, detainees at GITMO increase significantly, and that justice is served. The possibility of the military being deployed to restore peace is greatly increased by the ongoing "operation storm."

Continuity of Government

In previous Andrew Magazine articles I have sounded the alarm, but this warrants escalation to a new level. Continuity of Government (COG) will be foremost in our thoughts. Never before have we needed to restore order and take back our constitutional republic. I could go on much further and deeper into possibilities. In the meantime, be sure you encourage everyone in your circle of life to vote, including those you have social media influence with. It's no longer about Democrat or Republican. Thank you RFK Jr. for supporting Donald Trump. It's not about the "uniparty" corrupted system. This election it's easy. Your voting for freedom or communism will determine the outcome. Vote wisely.

Library of Truth

I encourage you to visit the "Library of Truth" on StormsUponUs.com and use it as a tool and resource to awaken others.

Our five daily wartime correspondents post each day daily at 6 PM EST. Their one to three minute audio sound bites will keep you informed, empowered, and connected.

Forecast

The storm on the horizon will be upon us soon. The eye of the storm is forming. Pray for protection of our President Donald J. Trump and for this nation to prevail. Dangerous as all this is, I believe in the end we are victorious. We are on God's side and God always wins. Pray.

The Left is Desperate

We have President Trump and we are awakened patriots no longer idly standing by. The Left is out of ammunition. All they have now is death and destruction. It is they who are panicking. It is they who are at the precipice.

As President Trump told the media at a military dinner gathering with a room full of US Generals, when asked "What storm Mr. President" The president responded by saying, "You'll find out". Unfortunately, it had to be this way. Well, we are that storm and America will rise again.

Don't Forget to
VOTE!
